

Dear Supporter,

### **Save The Donkey Field at Seaview**

Bob Seely, the Isle of Wight's MP, latest Newsletter contains the information quoted below. We support Bob's campaign calling on the Government to revisit and revise their proposals, including their algorithm, concerning future housing needs and how they should be met.

We would urge you to complete the Survey referred to below. The deadline of 11 November is close!

*"A survey has been launched by the Government asking people to share their experiences of the planning system and how it can be improved.*

*The survey also asks questions about whether we need more housing on the Isle of Wight and how much.*

*The Government intends to build 300,000 more new homes every year in England which will have an irreversible and devastating impact on our country's green landscape.*

*On the Isle of Wight, we will see our housing targets increased by over 50% to 1,045 dwellings a year. The Island can comfortably build about 200-300 units per year.*

*The impact of these new targets is huge. We will see more greenfield land lost to large housing developments and vast numbers of retirees moving here which puts pressure on our health system and other services.*

*I urge all Islanders to complete the survey, the results of which will be used by the Housing, Communities and Local Government Select Committee to inform future questioning to the Government.*

*The survey runs until 11 November and can be completed [here](#)\*. The survey will be open until 11:59 pm on Wednesday 11 November and takes approximately 10 minutes to complete.*

*The Select Committee will also host an online event on Thursday 26 November to find out more about the experiences of those who have dealt with the planning system. You can register your interest through the survey."*
